### Saturday

8:15 -9:00 registrations available for those not registered yet

9:00-10:30

**Lecture#1: A.G. Bell Room Caring Clown Programs Rich Snowberg**

#### **Capsule Description:**

Many clowns visit nursing homes and hospitals, but are not part of a program hosted by these facilities. This session will address such issues as: what is a program? ; where are they successful?; where can I learn more about them?; and what can I do to either get involved in an existing program or be the catalyst in starting a new one in my area?

#### **Intended Audience:**

For those persons who are caring clowns, or aspire to be this type of performer, and want to learn more about currently successful organized caring clown efforts throughout the world.

**Lecture #2 : Seminar Room #3 Oscar Munoz** Oscar will be taking a very different approach in this lecture. He will be applying improvisation techniques to developing a trick into a real magic effect. Basically he will be asking the participants to take a basic magic trick and work on how to improve it making it pack small and play big. We did not talk about this idea on the phone, but if the session participant were to bring a trick they are working on to the session then the group could help that person develop the trick.

**Lecture#3: Room 103 Glamour Girl Demo class (open to the first 8 only) Jenifer Pettigrew**

Show casing glitter tattoo's, eye make-designs and wacky hair

10:30-10:45 break

10:45-12:15

**Lecture #1 A.G. Bell Room Caring Clown Props/Routines/Ideas Richard Snowberg**

#### **Capsule Description:**

Attendees to this session will learn how to select props appropriate for caring clown venues. Participants will also see various caring clown routines that work well in hospitals and nursing homes.

#### **Intended Audience:**

Primary Audience: Clowns wishing to develop a repertoire of props and routines useable in hospitals and nursing homes.

**Lecture #2 Seminar room #3 Fast Faces**

**Roberta Mandella**

Simplified full face designs with WOW impact for large events.

**Lecture #3 : Room 102(open to first 8 only) TBA**

12:15-1:45 **Lunch at Kirby's** (don't forget your voucher included in your welcome package)

12:15-1:45 Dealer room open

12:15-1:45 Photographer available **A.G.Bell Room**

1:45-3:15

**Lecture #1 Seminar Room #3 Rainbow & Split Cakes**

**Roberta Mandella**

How to make fast pretty flowers, masks, snakes & more using split cakes

**Lecture #2 A.G.Bell Room Oscar Munoz subject Repeated Lecture from AM**

Oscar will be taking a very different approach in this lecture. He will be applying improvisation techniques to developing a trick into a real magic effect. Basically he will be asking the participants to take a basic magic trick and work on how to improve it making it pack small and play big. We did not talk about this idea on the phone, but if the session participant were to bring a trick they are working on to the session then the group could help that person develop the trick.

**Lecture #3: Room 102** (open to first 8 only)

**Balloons**

3:15-3:30 break

3:30-4:45

**Lecture #1 A.G.Bell Room Caring Clown Basics**

**Richard Snowberg**

**Capsule Description:**

This is an introductory lecture presentation on the role, responsibilities, and opportunities for caring clowns.

**Intended Audience:**

Primary Audience: Clown arts entertainers, who are not currently participating in ongoing caring clown work but are interested in learning about this field or are interested in becoming a caring clown,

Secondary Audience: Self-taught caring clowns that would like to experience a basic foundation of information and philosophy of caring clown work.

**Lecture #2 Seminar Room #3 Cheek Art:**

**Roberta Mandella**

Step-by-step instruction on popular designs and techniques to help make cheek art a breeze!
